Practice: 642 - Water Well Scenario: #1 - Well Point

## **Scenario Description:**

Typical construction is for a 2" diameter well screen, 36" long, with 2"diameter pipe and couplings are driven or water jetted to a typical depth depth of 20 feet into a shallow water bearing formation. The purpose of the practice is to provide water for livestock. The area near the well point is sloped to direct surface water away from entering the well.

### **Before Situation:**

Livestock have insufficient water or are fenced from their water source.

# **After Situation:**

Sufficient water is available for livestock. Utilize Pumping Plant (533) and Pipeline (516) as associated practices. Use Critical Area Seeding (342) where necessary to prevent erosion following construction activities.

Scenario Feature Measure: Depth of Well

Scenario Unit: Foot

**Scenario Typical Size:** 15

Scenario Cost: \$1,053.41 Scenario Cost/Unit: \$70.23

Cost Details (by category	/):			Price		
Component Name	ID	Component Description	Unit	(\$/unit)	Quantity	Cost
Equipment/Installation						
Rotary Drill Rig with Operator		Rotary drill rig including equipment and power unit costs and labor.	Hour	\$173.60	2	\$347.20
Labor						
General Labor		Labor performed using basic tools such as power tool, shovels, and other tools that do not require extensive training. Ex. pipe layer, herder, concrete placement, materials spreader, flagger, etc.	Hour	\$18.99	2	\$37.98
Materials						
Test, Standard Water Test, Well Water		Well Water Suitability test. Includes materials and shipping only.	Each	\$38.92	1	\$38.92
Well Screen, plastic, 2"	1997	2" PVC well screen. Materials only.	Foot	\$4.05	3	\$12.15
Well Cap, 2"	1784	Well cap, 2". Materials only.	Each	\$29.83	1	\$29.83
Well Casing, Stainless Steel/Copper, 2"	1796	Stainless steel or Copper well casing, 2". Materials only.	Foot	\$19.33	17	\$328.61
Mobilization				•		
Mobilization, medium equipment		Equipment with 70-150 HP or typical weights between 14,000 and 30,000 pounds.	Each	\$258.72	1	\$258.72

Practice: 642 - Water Well

Scenario: #3 - Shallow Well, ≤ 100 feet

# **Scenario Description:**

Typical construction is for the installation of a well, in areas where sufficient water is known to occur within 100 feet of the ground surface. The well shall be drilled, dug, driven, bored, jetted or otherwise constructed to an aquifer for water supply. The purpose of the practice is to provide water for livestock or irrigation. An average well depth is 75 feet. Well casings are 4-6" in diameter. Plastic casing is installed to a depth of 55 feet.

### **Before Situation:**

Livestock have insufficient water or are fenced from their water source. There is insufficient water for use in micro-irrigation.

## **After Situation:**

Sufficient water is available for livestock or irrigation. Utilize Pumping Plant (533) and Pipeline (516) as associated practices. Use Critical Area Seeding (342) where necessary to prevent erosion following construction activities.

Scenario Feature Measure: Depth of Well

Scenario Unit: Foot

Scenario Typical Size: 75

Scenario Cost: \$3,456.21 Scenario Cost/Unit: \$46.08

Cost Details (by category):						
Component Name	ID	Component Description	Unit	(\$/unit)	Quantity	Cost
Equipment/Installation						
Rotary Drill Rig with Operator		Rotary drill rig including equipment and power unit costs and labor.	Hour	\$173.60	8	\$1,388.80
Materials	•		•	·	·	•
Grout, cement		Cement grout meeting ASTM specifications for well sealing. Includes both neat-cement grout and bentonite gout mixtures. Includes materials, equipment and labor to place.	Cubic Yard	\$696.96	2	\$1,393.92
Well Screen, plastic, 4"	1998	4" PVC well screen. Materials only.	Foot	\$6.61	20	\$132.20
Well Casing, Plastic, 4"	1803	PVC or ABS non-threaded well casing, 4". Materials only.	Foot	\$3.52	55	\$193.60
Chlorine	1335	Liquid chlorine bleach. Includes materials only.	Gallon	\$2.83	1	\$2.83
Test, Standard Water Test, Well Water		Well Water Suitability test. Includes materials and shipping only.	Each	\$38.92	1	\$38.92
Aggregate, Gravel, Graded		Gravel, includes materials, equipment and labor to transport and place. Includes washed and unwashed gravel.	Cubic yard	\$22.40	1	\$22.40
Well Cap, 4"	1785	Well cap, 4". Materials only.	Each	\$24.82	1	\$24.82
Mobilization	•		•	•	•	•
Mobilization, medium equipment		Equipment with 70-150 HP or typical weights between 14,000 and 30,000 pounds.	Each	\$258.72	1	\$258.72

Practice: 642 - Water Well

Scenario: #4 - Well, single 4-6 inch PVC casing

# **Scenario Description:**

Typical construction is for the installation of a well, in areas where sufficient water is known to occur 100 - 300 feet of the ground surface. The well shall be drilled, dug, driven, bored, jetted or otherwise constructed to an aquifer for water supply. The purpose of the practice is to provide water for livestock or micro-irrigation. An average well depth is 200 feet. Well casings are 4-6" in diameter. Plastic casing and screen is installed to a depth of 200 feet.

### **Before Situation:**

Livestock have insufficient water or are fenced from their water source. There is insufficient water for use in micro-irrigation.

## **After Situation:**

Sufficient water is available for livestock or micro-irrigation. Utilize Pumping Plant (533) and Pipeline (516) as associated practices. Use Critical Area Seeding (342) where necessary to prevent erosion following construction activities.

Scenario Feature Measure: Depth of Well

**Scenario Unit**: Foot

Scenario Typical Size: 200

Scenario Cost: \$6,083.31 Scenario Cost/Unit: \$30.42

Cost Details (by category):						
Component Name	ID	Component Description	Unit	(\$/unit)	Quantity	Cost
Equipment/Installation						
Rotary Drill Rig with Operator		Rotary drill rig including equipment and power unit costs and labor.	Hour	\$173.60	20	\$3,472.00
Materials			•	•	·	•
Chlorine	1335	Liquid chlorine bleach. Includes materials only.	Gallon	\$2.83	1	\$2.83
Aggregate, Gravel, Graded		Gravel, includes materials, equipment and labor to transport and place. Includes washed and unwashed gravel.	Cubic yard	\$22.40	1.5	\$33.60
Grout, cement		Cement grout meeting ASTM specifications for well sealing. Includes both neat-cement grout and bentonite gout mixtures. Includes materials, equipment and labor to place.	Cubic Yard	\$696.96	2	\$1,393.92

Well Casing, Plastic, 4"	1803	PVC or ABS non-threaded well casing, 4". Materials only.	Foot	\$3.52	150	\$528.00
Well Screen, plastic, 4"	1998	4" PVC well screen. Materials only.	Foot	\$6.61	50	\$330.50
Test, Standard Water Test, Well Water		Well Water Suitability test. Includes materials and shipping only.	Each	\$38.92	1	\$38.92
Mobilization						
Mobilization, medium equipment	1139	Equipment with 70-150 HP or typical weights between 14,000 and 30,000 pounds.	Each	\$258.72	1	\$258.72

Practice: 642 - Water Well

Scenario: #6 - Deep Well, steel or copper

# **Scenario Description:**

Typical construction is for the installation of a well, in areas where sufficient water is known to occur greater than 2000 feet from the ground surface. The well shall be drilled, dug, driven, bored, jetted or otherwise constructed to an aquifer for water supply. The purpose of the practice is to provide water for livestock or micro-irrigation. An average well depth is 2500 feet. Plastic Surface casings are 6" in diameter with smaller diameter casing and screen extending into the water bearing formation. Steel casing and screen is installed to a typical depth of 2500 feet.

#### **Before Situation:**

Livestock have insufficient water or are fenced from their water source. There is insufficient water for use in micro-irrigation.

### **After Situation:**

Sufficient water is available for livestock or micro-irrigation. Utilize Pumping Plant (533) and Pipeline (516) as associated practices. Use Critical Area Seeding (342) where necessary to prevent erosion following construction activities.
